WITNESSES TO ALIBIS.

Shady Trade Which Once Flourished In New York's Courts,

The elder Weller in "Pickwick" was, as all admirers of the works of Dickens will know, a great believer in the utility of an alibi as a defense in both criminal and civil actions.

"Never mind the character," said Mr. Weller to his son. "Stick to the alleybl. Nothing like an alleybl, Sammy; nothing. Verever he's agoin' to be tried, me boy, a alleybi's the thing to get him off."

This sage advice of Mr. Weller found frequent corroboration in the views of criminal lawyers in town up to a very few years ago. There were half a century ago more criminal lawyers than there are today, and the emoluments and fees of criminal lawyers were materially larger in the orconsequence, cases were more often defended than they are now and pleas of guilty much more rarer. Then the allbi witness was a necessary though usually unwelcome part of the machinery of defense in criminal cases. There is in criminal procedure no better defense than an alibi if sustained. Allbi witnesses were therefore very much in demand until furles began to mistrust them and the penalties for the crime of perjury were visited upon

some of the delinquents. For a long time the mendacious and subsidized testimony of professional alibi witnesses obtained credence from jurors, and some of these witnesses, to quote their own language, "made a good thing out of it." Juries in criminal cases are usually sympathetic where no outside pressure is brought upon them, and it is the part of the charge of every judge in a criminal case to inform the jury that the prisoner at the bar is entitled to every reasonable doubt. If, therefore, any uncertainty existed on the point whether or not the prisoner was actually present at the time and place of the alleged crime he was entitled to the benefit of it, but little by little the with the identity and records of the professional alibi witnesses. One or two were prosecuted. Others were scared off. The commercial value of the services of the others was decreased, and finally the whole nefarious business was abandoned, never since to be revived.

CURE OF INSOMNIA.

The soporific powers of warm milk are well known, but care should be taken that the milk does not quite boil. A Swedish method of producing sleep is to wring out a handkerchief in fcy when it is said to act like magic.

To many constitutions a warm bath taken immediately before going to bed is very soothing and produces drowsiness, while an apple eaten as the last thing is equally effective.

The homely boiled onlon is another sovereign remedy, or an onion may be sliced and eaten raw, the disagreeable taste being removed by taking a little sugar or a pinch of tea afterward.

A Hindoo practice to induce sleep is to take deep inhalations, expelling the air alternately through each nostril, keeping the other closed with the finger. This has a wonderfully quieting
